As the deadline for the federal government to fund itself looms, House Majority Leader Kevin McCarthy and other Republicans are working behind the scenes to hammer out a stopgap spending bill that would prevent another government shutdown on Feb. 8. The stopgap measure would fund the government through March 22 and maintain funding for roughly 50 percent of the federal government. It would also extend current restrictions that limit the president's ability to transfer funds overseas to prevent any of those funds from going to Iran. The effort is complicated by a number of hurdles, including the unusual step of advancing a bill when the government has been open for several days. McCarthy and his team are trying to negotiate the spending plan with House Minority Leader Nancy Pelosi and her team, and the administration. It is not clear if both sides agree on all of the elements that are needed. A key sticking point has been whether a proposal to protect funding for the Children's Health Insurance Program is attached to the bill, and whether the spending for the Children's Health Insurance

Program would be offset by new spending on a1d647c40b
