Java FX 2.2 is a powerful user interface (UI) toolkit that enables the creation of graphical user interfaces (GUIs) in Java. It was created by Oracle as part of the Java 8 platform and

language effort. Java FX is based on Java 5. Java FX is a comprehensive and efficient UI toolkit, which gives Java programmers a powerful, yet simple way to create impressive GUI applications. Java FX features provide the capabilities of a full-featured desktop development environment to Java developers. The exciting thing about Java 8 is the change in the language. When Java 7

came out it was great to use. But with Java 8 and 8 you don't need a container to run your code and it can be used on any language. So you can use your JavaScript (JS) code on Java, so just by using new Java 8 APIs you can interact with Java code. Java 8 is the first release in a new generation of the Java platform. It builds on a new language, platform and runtime, and new APIs. Oracle aims to make it easier for developers to

develop new Java-based applications that are deployed on a large range of operating system platforms, from desktop PCs and servers, to mobile phones and tablets.
