FAQ UPCAT Answer Key, UPCAT Exam Questions, UPCAT pdf, University of Canterbury College Application University of Canterbury. pdf-answer-key (pdf-answer-key)Â .This invention relates to distributed telecommunications switching systems. More particularly, this invention relates to distributed switching systems having one or more aggregated line card modules. The aggregated line card modules do not share a common switching plane. Instead, the switching plane of each aggregated line card module is shared with one or more other aggregated line card modules. Distributed telecommunications switching systems having several aggregated line card modules are known. Each line card module is separate from the others and physically remote from the other line card modules. Switching is performed in each line card module independently of the others. The switches are interconnected with a control system. The control system synchronizes data with the other line card modules to insure that data traffic is not transmitted in an incorrect order.
